Flexi-firm provides superior comfort and support thanks to its special geometric structure. Enjoy flawless sleep joy by sleeping on a sleep surface that conforms to your body shape and responds to your weight.

Flexi-firm is the union of specially designed springs whose geometric shape provide a soft sleep surface in the initial stages of sleep and a firmer surface as time elapses. Flexi-firm allows you to adjust the firmness to desired level.

During a good night's sleep, the spring system supports your body so that natural movement all through sleep helps relax your muscles.
