High count spring system; A symphony of comfort developed by combining the flawless point flexibility of pocket springs to provide optimum support for the whole body during sleep, and cell pocket spring system known for maintaining the spine in its natural curve by carefully balancing weight throughout the surface.

The independent spring system provides everything you look for in a quality mattress like firmness, flexibility and resilience all in one. The spring layers work in unison to build layers of comfort for many years based on a strong foundation. Supports your lower back and conforms to the body's natural curves by minimizing the exerted pressure. Double sided use caters to your comfort preference with softer or firmer surface.
